

UPeake Transport

Version: 2.0 - Effective Date: 05/13/2026

Chain-of-Custody Overview & Protection Policy

Client Information & Operational Accountability Summary

UPeake Transport utilizes structured chain-of-custody procedures designed to support the secure, traceable, and accountable transportation of materials throughout the delivery process. Every shipment is managed through documented operational procedures intended to maintain visibility, handling accountability, and controlled transfer practices from pickup through final delivery.

Materials are transferred only between authorized individuals, including approved client representatives, trained UPeake personnel, and designated receiving contacts. Transportation activities may include documented pickup confirmations, transport manifests, delivery verification, and operational tracking procedures to support shipment traceability and service transparency.

UPeake drivers and operational personnel are trained to follow secure handling procedures and client-specific transport instructions while maintaining professionalism and controlled custody of transported materials. These procedures are designed to help protect shipment integrity, reduce operational risk, and support compliance-focused transportation standards including confidentiality awareness and secure handling expectations.

Through structured dispatch oversight, documented accountability procedures, and secure handling practices, UPeake Transport remains committed to providing dependable logistics services that support client confidence, operational reliability, and professional transportation execution.

Notice

This document is intended to provide a general overview of UPeake Transport's chain-of-custody operational practices and handling procedures. Specific transportation requirements, client agreements, or operational protocols may supplement these procedures where applicable.
